29. Finding my inner gold
30. Developing attention
31. Meditation
32. Disease management
33. Develop Compassion

Based on user selection a personalized leaderboard will be created under the following pillars of development

Daily Ritual

Purpose: Create consistency, regulate behavior, thoughts and emotions, acts as a stabilization mechanism that promotes long-term behavior refactoring through changes in micro-dose

Personal Development

Purpose: Personal development strengthens man's natural 'Call of Self'. CereBro aids this call of individuation and psychological maturity by making available methods and tools which suit personal aspirations ensuring users have choice and control over how they express themselves.

Spiritual Development

Purpose: Spiritual Development integrates the various parts of our journey, discoveries, awareness, insights, actions, peak experiences, losses and griefs, to help sublimate and transmute latent psychological intent into an active Act of Will. Manifest spirit into matter.

Creative Development

Purpose: Creative development expands consciousness. Man is born to will, choice and consciousness. Beyond fight, flight or freeze actions, the ultimate expression of free will is the ability to engage in contemplation, imagination and creation. Creation is the highest

form of individual expression and to engage in creation involving human intuition and ingenuity beyond concrete consciousness gives rise to genius.

1. DAILY RITUALS

These are behaviours that anchor the day, regulate the system, and create continuity.

Regulate the body. Anchor the day. Create stability.

Gamification element:

- Progress bar on each activity when expanded
- Points for completing streaks
- Unlocking self-reward on reaching a milestone

System support

- Alarms
- Reminders
- Notifications
- Checkins
- Feedbacks
- Self report assessments
- Baseline creation
- Medical profile creations

Analytics

- Stress (ZER)
- Sleep Hygiene
- Ritual completion
- Action on Insights

-

Purpose: Strengthen the inner chooser, clarify identity, and expand emotional maturity.

3. SPIRITUAL DEVELOPMENT

These cultivate meaning, inner alignment, and connection to a deeper center.

Move from ego-driven striving to inner alignment, coherence, and purpose.

- Develop a spiritual center
- Reduce anxiety
- Experience love
- Develop compassion (shared with personal development)
- Meditation (shared with daily ritual)
- Depth work (shared with personal development)
- Shadow work (shared with personal development)
- Experience love (shared with personal development)

Purpose: Integrate the personality with a deeper organizing principle — the Self.

4. CREATIVE DEVELOPMENT

These open the imaginal, intuitive, and generative dimensions of the psyche.

Expand imagination. Open intuitive and generative intelligence.

- Develop imagination
- Develop intuition
- Develop creative thinking

Purpose: Expand symbolic intelligence, creative flow, and non-linear problem solving.

An example of how a personalized LeaderBoard will look like for a CereBro user

Psychological development through CereBro's journey

Daily Ritual — *Regulates*: stabilizes the nervous system and creates predictable rhythms.

Personal Development — *Strengthens*: builds agency, identity, and emotional maturity.

Spiritual Development — *Integrates*: aligns personality with deeper coherence and meaning.

Creative Development — *Expands*: opens imagination and generative intelligence.

Designing Reward strategy

All quadrants of the pillar start with a 100 points. These are preloaded points. These points can be clubbed to translate into rewards. The system will have internal rewards and external rewards

What earns points

- Streaks earn points
- Milestone earn points
- Completing assessments earns points
- Completing the learning module earns points
- Completing medical profile earn points
- Completing al profile earn points
- Completing surveys earns points
- Completing quests/ gamified elements earns points
- Completing insurance details
- Regular health check and uploading prescription

- Daily check-ins earn points

There is no deduction of points.

Points do not laps

Points can be converted into rewards such as coupons or free coaching sessions but not for cash

[Gamification in healthcare: Business benefits and real-life examples \[2026\]](https://www.openloyalty.io/insider/gamification-healthcare)

Examples specific to CereBro which need further research

- Headspace: Uses gamified mindfulness exercises for mental health
- SuperBetter: Frames mental health challenges as heroic quests

How CereBro needs to use gamification

- Daily reminders and tracking systems
- Reward systems for consistent medication taking

- Progress visualization and achievement markers
- Social support and accountability features
- Immediate feedback on adherence patterns
- Enhanced data analytics for outcomes measurement
- Improved integration with electronic health records
- **Combination of user engagement and clinical application**
